- Water Meter Charge This is a base rate charge for the maintenance, operation, and repair of the in-ground distribution system from the water plant to the main in front of your property.
- Tiered Water Fees This is the water usage charge, which covers the cost to operate and maintain the city's water system, inclusive of pumping by the City's well, production at the water treatment plant, reservoirs, and disinfection chemicals for the facilities. The tier system is based on peak production of water. (See chart above)
- Stormwater Charge This charge is for contributed costs of maintenance and repair of the public stormwater infrastructure. This includes cleaning inlets of debris, maintenance of water inlets, basins, pipes, and other public infiltration infrastructure. These funds allow for street funds to go towards grant matches for transportation focused projects.

- Sewer Base Charge This charge funds maintenance, operations, and repair of the in-ground wastewater system. The wastewater system consists of a network of gravity mains, lift stations, pump stations, and pressure mains.
- Sewer Charges This charge is based on an average of winter water usage (December to April billing). These funds cover the cost to operate and maintain the wastewater treatment plant.
- Garbage & Recycle These rates are set by Waste Control which is a contracted service. For more information on these rates, call 360-225-7808
- 7. **Utility Taxes** These funds are apart of the City's general fund, which are used to support the different departments, such as police, clerk treasurer's office, community development, public works, and city administration.
