

Got Tall Grass or Overgrowing Vegetation?

It's that time of year again when vegetation growth may be getting out of control. The city receives numerous complaints every year involving overgrowth of vegetation, tall grass, and yards that are not being regularly maintained.

There are regulations within Woodland's Municipal Code (WMC 8.12.020 and WMC 8.04.010) regarding how tall grass and weeds can get before they start to become a public nuisance and a fire hazard. If your yard has weeds or grass taller than 12 inches, it is in violation of the city's nuisance code.

Please be neighborly and aid us in keeping our city safe and well maintained. Take the time to keep weeds and grass trimmed, remove any invasive species properly, and be sure to keep shrubs and trees from reaching out over sidewalks and into the street throughout the growing season.

The City of Woodland thanks you for your cooperation!
