February 22, 2024

To: Property Owner / Current Tenant

Subject: Roadway improvement project in your neighborhood

Project: I-5 at SR 503 Interchange (Exit 21)

The I-5 at SR 503 Interchange (Exit 21) Project will improve the transportation system within the Exit 21 interchange area. The city, in partnership with consultant engineers, is beginning preliminary design of the improvements. During the project, survey crews and engineers may need to access your property. They may take photos, measurements, and may leave temporary or permanent markers.

The survey crews will be from PBS Engineering & Environmental, Inc. (PBS) and engineers will be from Kittelson & Associates, Inc. (KAI), Environmental Science Associates (ESA), and PBS. They will:

- **Never request to enter your home.**
- Survey crews will drive marked company vehicles and carry proper identification.
- Attempt to notify occupants living on or near the property in advance, leaving written notice if occupants don't answer.
- Keep closed gates closed and leave open gates open.
- Respect the rights of property owners.
- Conduct their work professionally and safely.

The survey crews' work will help build a map with topography, property lines, soils, trees, and utilities. The project team will use this map to design improvements at the Exit 21 interchange. Having a design will allow the City to apply for grants to fund future construction. Other project team members are actively working in the field performing field investigations needed to complete a successful project.

For additional project information, please visit the City website at:
